RUBBER

PRODUCT DESCRIPTION

ACTIVE rubber grease is a water-resistant, multi-purpose calcium soap grease with a fibrous structure, produced with high quality base oils and special additives. It is suitable for low and medium speed bearings, low speed plain bearings and chassis applications where the operating temperature does not exceed 80°C. Thanks to its adhesion enhancing substances and fibrous structure, it adheres to metal surfaces, protecting the metal and preventing wastage.

APPLICATIONS AND KEY FEATURES

- Resistant to water, heat and wear
- Minimizes corrosion by preventing oxidation
- Usable over a wide temperature range
- High adhesion: durable film on metal surfaces
